

Next Level Reporting & Analysis

WolfePak Analytics transforms valuable data stored in your WolfePak Oil & Gas ERP system into actionable information that enables faster, more intelligent business decisions.

ENABLING ACCESS TO DATA

WolfePak Analytics enables you to create your own ad-hoc reports and graphics using Microsoft® Excel. WolfePak Analytics also provides a full set of templates for General Ledger, Oil & Gas Operator and First Purchaser reports and trend analysis.

With WolfePak Analytics, you have easy-to-read dashboards that help proactively identify and address declining well performance, monitor volume sold and price and many other critical components affecting profitability.

- Analyze information and trends across multiple operating companies at the account, account range, property or well level
- Quickly determine the profitability of wells and properties
- View and analyze trends on daily volume and associate dollar amounts from Run Tickets filtered by property, operator, driver or stations

Functionality Highlights:

Easily create dashboards for investors and stakeholders

Graphically view trends in your business

Forecast cash flow for more efficient operations

Create financial packages & LOS reports customized to your operation
