

Securely Connect to WolfePak, Anywhere

WolfePak Anywhere gives WolfePak users access to their critical ERP data on any device, at any time, from anywhere. It is a complete solution for managing your WolfePak installation that provides maximum up-time and business continuity under any conditions.

AN EASY, DEPENDABLE SOLUTION

Using WolfePak Anywhere eliminates the problems with upgrades and the various hardware and IT support costs. We take responsibility for redundancy, data backup, and disaster recovery so you can focus on your oil & gas business.

- Backups occur four times a day
- Self-restores of data available on-demand
- Encrypted, secure connections with 2FA (two-factor authentication)
- Client-side managed passwords and password resets
- Improved through-put using high-powered virtual servers

Secure Remote Solution:

Open multiple windows per session

SOC 1, Type 2 secure connections

Client managed passwords & resets

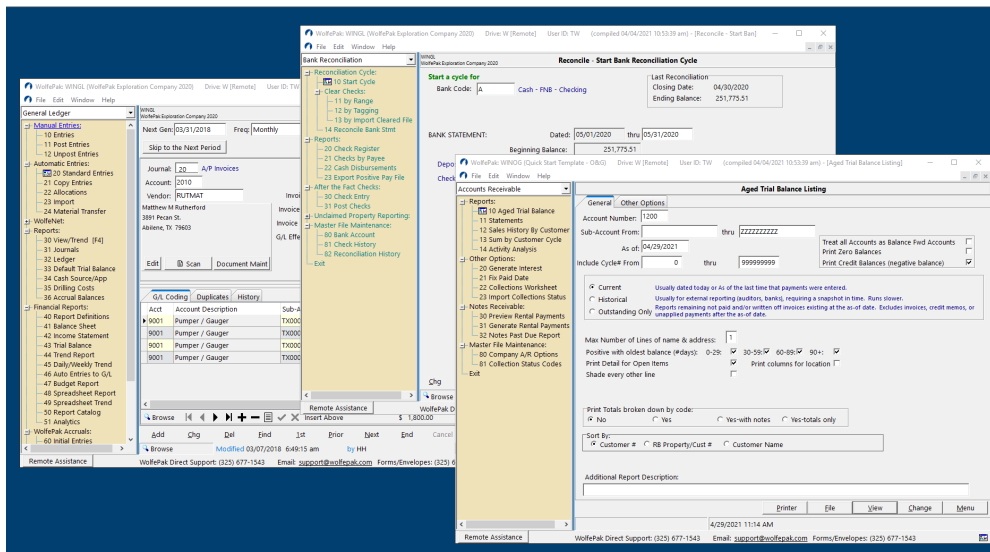

Transfer files to local drives easily

Improved performance and speed

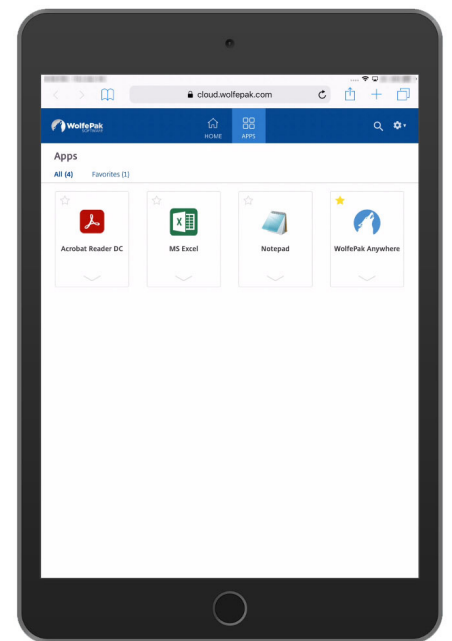

Exclusive access to the latest features

WOLFEPAK ANYWHERE FEATURES

- State-of-the-art data protection leverages built-in cloud security with added two-factor authentication, encrypted storage, and automatic 3X daily backups.
- Protected by SOC I, Type 2 certified cloud and encrypted communication between WolfePak Anywhere and any device.
- Similar ease of use – works just like locally installed software. WolfePak’s baked-in oil and gas expertise fuels accounting workflows and rapid report generation.
- Powerful cloud servers fuel performance speed, even for the most complex tasks.

Work within multiple windows and multiple companies during a single connected session.

Easy web-based access connects you to WolfePak across devices including desktops, laptops, and tablets.
