

WolfePak ERP SaaS Offering

Prevent Interruptions in Your Operations

WolfePak SaaS (Software-as-a-Service) provides business continuity and maximum up-time under any conditions. It is a complete solution for managing your WolfePak installation. We keep your WolfePak software up-to-date, perform daily backups, and ensure your system is safe and secure.

EXCLUSIVE ACCESS TO NEW FEATURES

As a SaaS customer, you operate on the most recent WolfePak Software version and have exclusive access to new feature enhancements. Upcoming releases will offer web-based analytics and reporting, available only in our SaaS subscription.

AN EASY, DEPENDABLE SOLUTION

Using WolfePak as a SaaS solution eliminates the problems with upgrades and the various hardware and IT support costs. We take responsibility for redundancy, data backup, and disaster recovery so you can focus on your oil & gas business.

- Backups occur four times a day
- Self-restores of data available on-demand
- Encrypted, secure connections with 2FA (two-factor authentication)
- Client-side managed passwords and password resets
- Improved through-put using high-powered virtual servers

Secure Remote Solution:

Backups & Business Continuity

Secure, encrypted connections

Client managed passwords & resets

Improved Performance

Always Up to Date

Exclusive Access Newest Features
